# FAZEINU UTILITIES

## Cross-Chain Smart Contracts

Fazelnu (Faze) is actually available on the Binance Smart Chain for now, which is upgradable to Polygon (MATIC) network. Matic network is cheap also native for the Indian and Global Market. Main Contract will be audited regularly to overcome any errors faced through various rigid audits which will be carried out.

## Liquidity Mining

You can mine Fazelnu Token through liquidity mining at PancakeSwap. You will get rewarded to secure the network. Liquidity Mining is the easiest way to earn money while securing the network and the framework of the price. Fazelnu has automated LP detect source which rewards the end users

## Rewards Bonuses and Fees Discounts

Holding Fazelnu Tokens will give you rewards percentage bonuses on the Fazelnu (Soon) platform. Up to 100% bonus on different available ways to earn cryptocurrencies: Staking, Storing value, Gaming, Liquidity mining and also through various weekly events, which increases the price of the token and ultimately profiting the early birds

## Staking Reward

FAZEINU Binance Smart Chain holders share in a 3% distribution fee. Your wallet grows with every transactions, buy or sell: 3% of each transactions is distributed to FAZEINU Holders. Furthermore, on-chain staking with high APR will soon be available on the native platform which will be released sooner than expected time frame, dont forget to through our legendary Roadmap.

# ABOUT THE FAZEINU – WEB3 TOKEN

Fazelnu is an innovative Binance Smart Chain Token that maximizes profit with DeFI Yield Generation and Crypto Earning Systems. Fazelnu Token has been created with a progressive, automatic burn mechanism to form a bond between our product and our goals

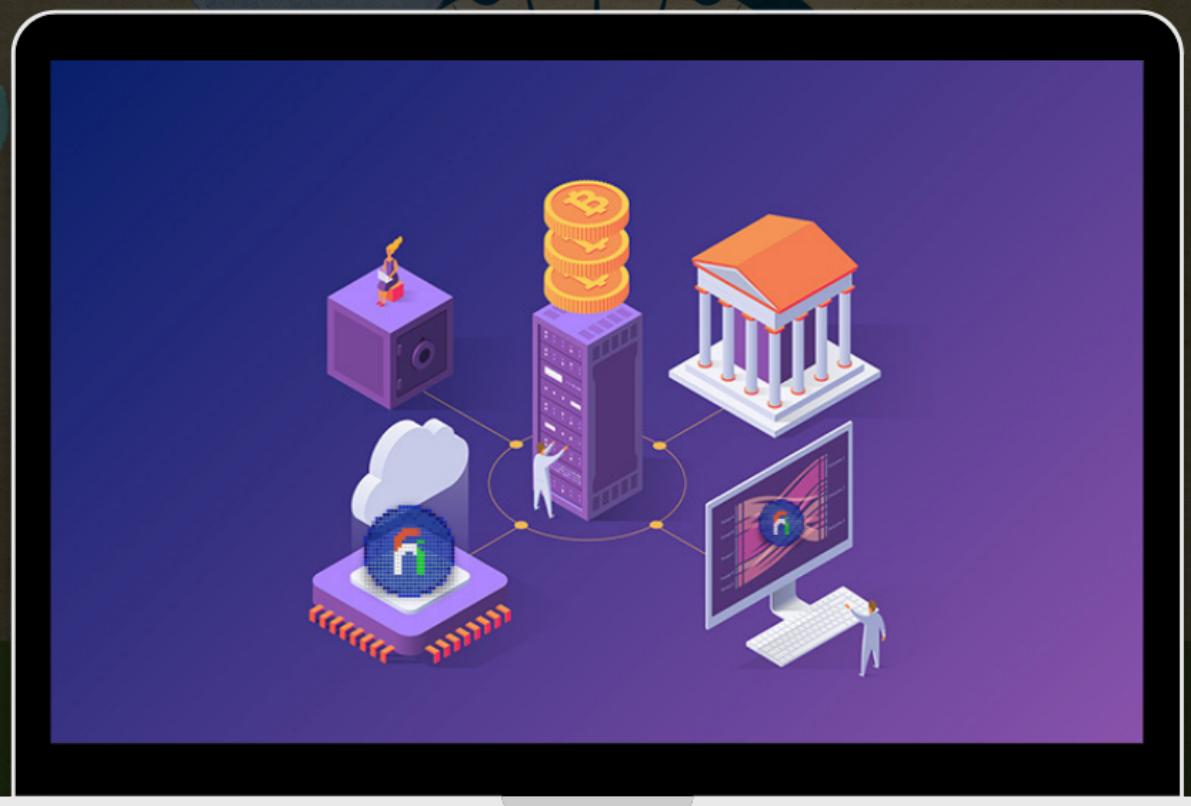

Fazelnu source code which itself generates the Self Executable database shows how diverse the Intra-Capability of the Web3 version it is capable of. This also allows the creator to Tweak some of the updatable database through series of connected yet easy commands.

```
/// Execute multiple queries and return the rows affected
fn execute_many<'e, 'q: 'e, E: 'q>(
    self,
    query: E,
) -> BoxStream<'e, Result<<Self::Database as Database>::Query<E>,
where
    'c: 'e,
    E: Execute<'q, Self::Database>,
{
    self.fetch_many(query) : BoxStream<Result<...>>
        .try_filter_map(|step : Either<<...>::QueryResult, ?> | async
            Ok(match step {
                Either::Left(rows : <<...>::Database as Database>::QueryResult) => rows,
                Either::Right(_) => None,
            })
        }) : TryFilterMap<...>
        .boxed()
}
```

## FAZEINU UNIQUE PLATFORMS

Fazelnu will provide unique staking and liquidity platform for all the legitimate projects which itself will create an ecosystem throughout the Fazelnu network which will be rapid and smooth.

Integration of Staking for other projects will be game changing as it will keep on investors sticked to the project because of high APR within the network, unique yet simple - Just stake and let your investment grow along with your profit return.

New projects will unleash the vast potential of Fazelnu through series of events which lead to new stakers on the network providing more secure environment for the stakers.

## WHAT WE AIM TO ACHIEVE

We want our self executable network to be used worldwide with direct transactions at low cost and also want to target currently userbase which provides the service for now charges GWEI way higher than it should be.

We would also bring the P2P which would be faster and smoother to use for normal users as well which will bring in more users to this space.

Our In-house staking will ensure that each holder receive massive APR till the time they hold our token which would also boost the morale of investors/holders.

Few of examples as mentioned below for current market traders preference.

Many traders use upwards of 20+ different tools.

METAMASK

coinbase

OpenSea

BINANCE

CoinMarketCap

MoonScan

CoinTracker

PancakeSwap

DEXT

FazelNu will be an game changer in the field of financial transactions and also gaming industry with its unique inhouse self execution capabilities.

## **TOKENOMICS AND DISTRIBUTION OF FINU**

The Tokenomics of FINU is very unique as it is deflationary by nature along with that, weekly reward mechanism will make sellers rethink because of holding APR which FINU will provide to its investors.

Total supply is only 1,000,000,000 which is fixed and cannot be increased but ofcourse it can be reduced by burning

Token distribution is as follows.

# FINU TAX DISTRIBUTION

Fazelnu is build with low tax and high benefit, Holding Fazelnu will reward the end user through series of automated tasks performed through web3 and the Source code itself.

Total Buy Sell Tax is 7% each with REFLECTION 3%, BUY BACK 3% & LIQUIDITY 1%.

TYPE	BUY	SELL
REFLECTION	3%	3%
BUYBACK	3%	3%
LIQUIDITY	1%	1%

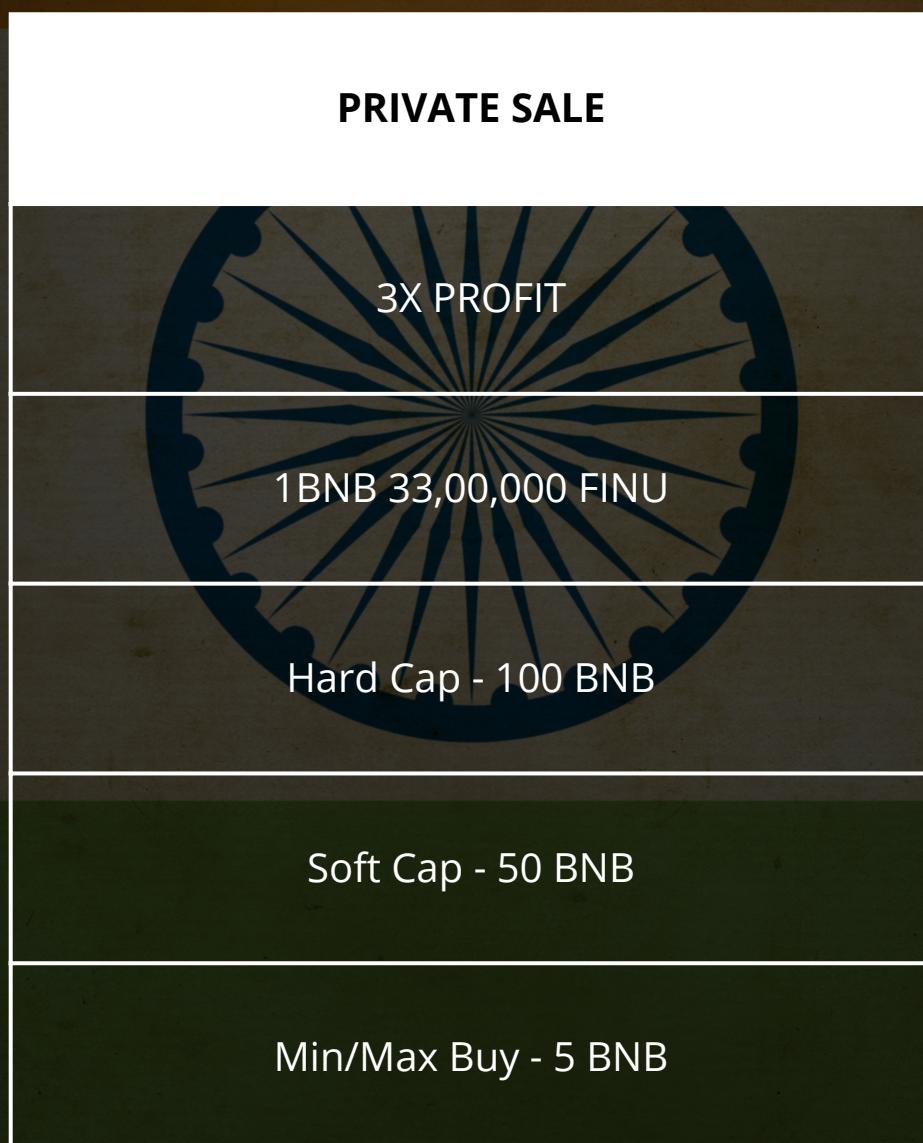

Fazelnu will launch its staking the day token is launched to boost morale of early investors, as most of the project do Xtimes profits but do they sustain? Ya you got it right staking will open new capability to the investors to gain more from there holdings.

# **PRIVATE SALE**

.....

Private sale is the perfect time to buy because the launch price of the FINU is 3x the private sale price, along with that Private sale buyers will receive additional tokens based on there holdings.

Set the timers as the presale will be filled rapidly, dont miss the bullet train. Private sale will also provide whitelist which means the day token is launched there wont be any tax applied for selected users.

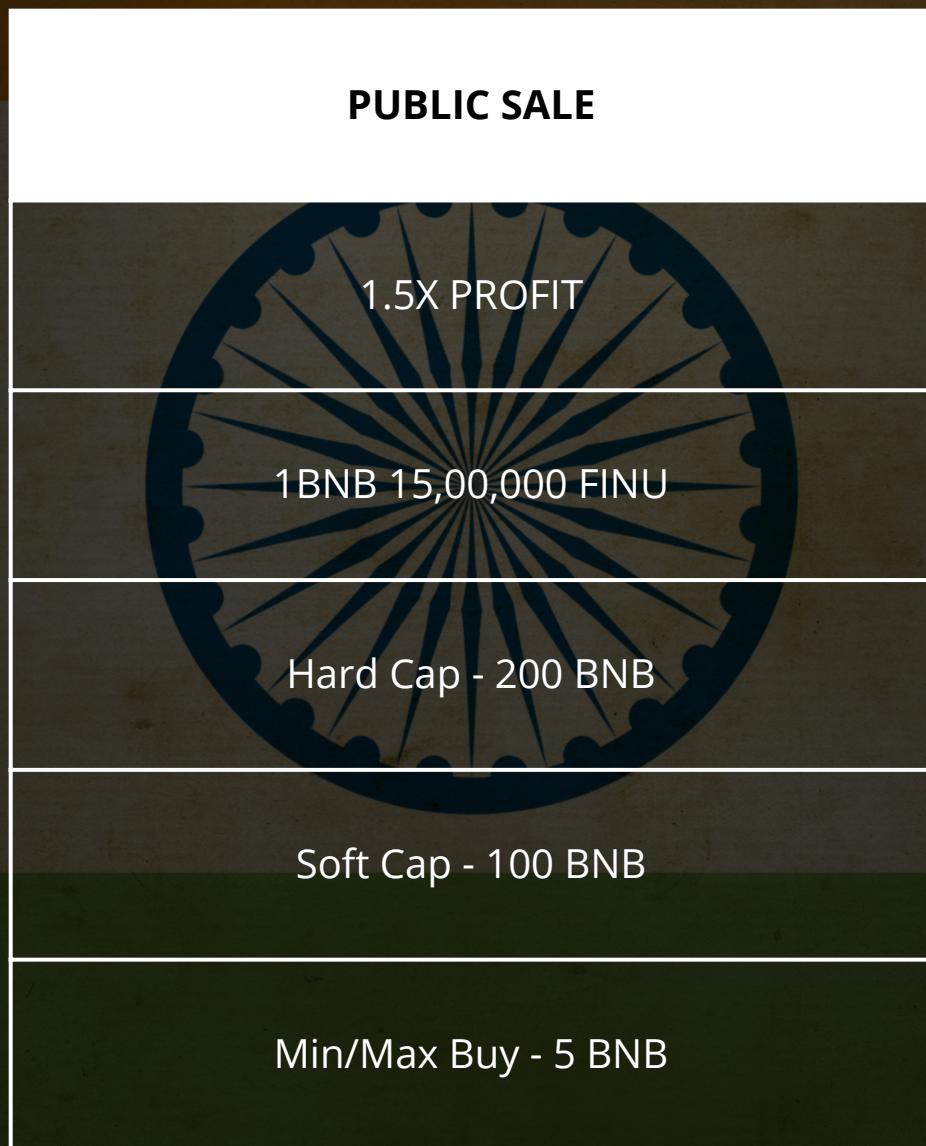

# **PUBLIC SALE**

.....

Those who missed the private sale, Public still gives a great deal because the public sale is offering 1.5X return with the launch price. So make sure you have bag full of FINU.

The Next moon shot project, miss to regret latter
